

SNV In Mozambique

Since 1995, SNV has been developing a diverse portfolio of programmes, partnerships, products, thematic knowledge, and expertise in Mozambique. SNV currently works in the sectoral areas of Agri-Food Systems, Water, and Energy, collaborating closely with government, local development partners, private sector, knowledge institutes, and lowincome communities to transform ideas into results.

Besides helping achieve household-level impact, SNV contributes to systems change to ensure the long-term sustainability of interventions. SNV helps develop livelihoods and improve the wellbeing of Mozambicans by fostering inclusive development and systemic change, supporting locally owned approaches, strengthening governance systems, and improving markets for people living in poverty.

Quick facts

Sectors: Agri-food, Energy and Water systems

Offices: Three offices - Maputo, Nampula and Lichinga cities

Local staff: More than 70 people

SNV is a mission-driven global development partner working in more than 20 countries across Africa and Asia. Building on 60 years of experience and grounded in the 2030 Agenda for Sustainable Development, we work on the core themes of gender equality and social inclusion, climate adaptation and mitigation, and strong institutions and effective governance. Together with our team of over 1,600 people, our mission is to strengthen capacities and catalyse partnerships that transform the agri-food, energy, and water systems, which enable sustainable and more equitable lives for all.

By sharing our specialist expertise in Agri-food Systems, Energy and Water, we contribute to tackling some of the leading problems facing the world.

Our global network and local presence

Working closely with specialised local development organisations providing high quality services to governments, private sector and civil society will ensure

that programmes are locally owned, led, and can foster innovative, long-lasting results.

Recognizing that sustained poverty reduction requires people living in poverty to both contribute to and benefit from growth while having access to quality basic services SNV's work focuses on enabling the four factors essential for successful development: inclusive development, systemic change, local ownership, and contextualised solutions.

For more than 50 years SNV has been present in some of the most underdeveloped countries around the world, including fragile states. And we continue to be present, on the ground, in Asia, Africa and Latin America.

BRILHO - Energy Africa | 2019-2026

BRILHO is a programme that will catalyse Mozambique's off-grid energy market in order to provide clean and affordable energy solutions to the country's off-grid population. BRILHO's overall goal is to improve and increase energy access for people and businesses, leading to money saving and improved well-being and livelihood opportunities for low-income populations.

T WASH II | 2021-2026

Transforming Access to Water Sanitation and Hygiene and Nutrition Services II is a project with nationwide coverage, created to deliver sustainable and resilient water, sanitation and hygiene (WASH) and nutrition services for rural communities through support to the Government of Mozambique's PRONASAR programme. The TWASH II aims to reduce waterborne diseases and improve the wellbeing of rural populations by building the capacity of government to respond to and deliver effective and efficient decentralized WASH services, combined with large scale fund management component to contract and deliver resilient and sensitive WASH services.

Strengthening Sustainability of Sasol's WASH programme | 2020-2025

The Strengthening Sustainability of Sasol's WASH programme (SSoS WASH) was developed by SNV with Sasol. SNV will support Sasol in realising this approach through a five-year WASH project in Inhambane, focusing on improving, rehabilitating, and sustaining water supply services, positively changing behaviours to keep systems operational, and promoting improved hygiene practices. The project will reach 40,000 people from 7,600 households and will also involve 12 schools and 7 health centres serving the 37 target communities.

GoTAS Phase III | 2022-2026

GoTAS Phase III, is a Governance Program in Water, Sanitation and Health, implemented in partnership with the INGO United Purpose. It aims to improve the living conditions of the rural population in seven Districts of Niassa Province through the provision of rural WASH services promoting effective decentralization and active participation of citizens organized through decision-making forums.

Supporting AIAS in Water and Sanitation Service Delivery to small towns in Mozambique – Phase II | 2021-2025

In support of the government's national programme to improve water and sanitation services across 75 small towns, SNV is responsible for development of sanitation plans, mobilisation of school sanitation clubs, and support for sanitation demand creation and construction of public toilet blocks. We help develop the sanitation supply chain by training local artisans, introducing technologies and coaching sanitation entrepreneurs.

Small Town Sanitations | 2022-2024

The Small Town Sanitation (STS) project will enable the delivery of improved, equitable sanitation to more than 500,000 people in 10 towns across Cabo Delgado, Nampula, and Zambezia provinces.

The project will facilitate the creation of systems, services, and norms that will drive long-term uptake of improved sanitation.

Green Jobs for Youth in Northern Mozambique (GeraSol) | Mozambique | 2024-2028

The GeraSol project is aimed at youth employment and entrepreneurship in the renewable energy sector in the three Mozambican provinces of Niassa, Nampula and Cabo Delgado. The project is a Public-Private Development Partnership that builds on SNV's pioneering work and experience in both supporting access to energy and creating jobs for young people in Mozambique. The project combines qualified young people with emerging roles in a growing renewable energy market, with particular emphasis on Solar Home Systems.

Transformative Land Investment (TLI) | Myanmar, Laos, Ethiopia, Ghana and Mozambique | 2022-2025

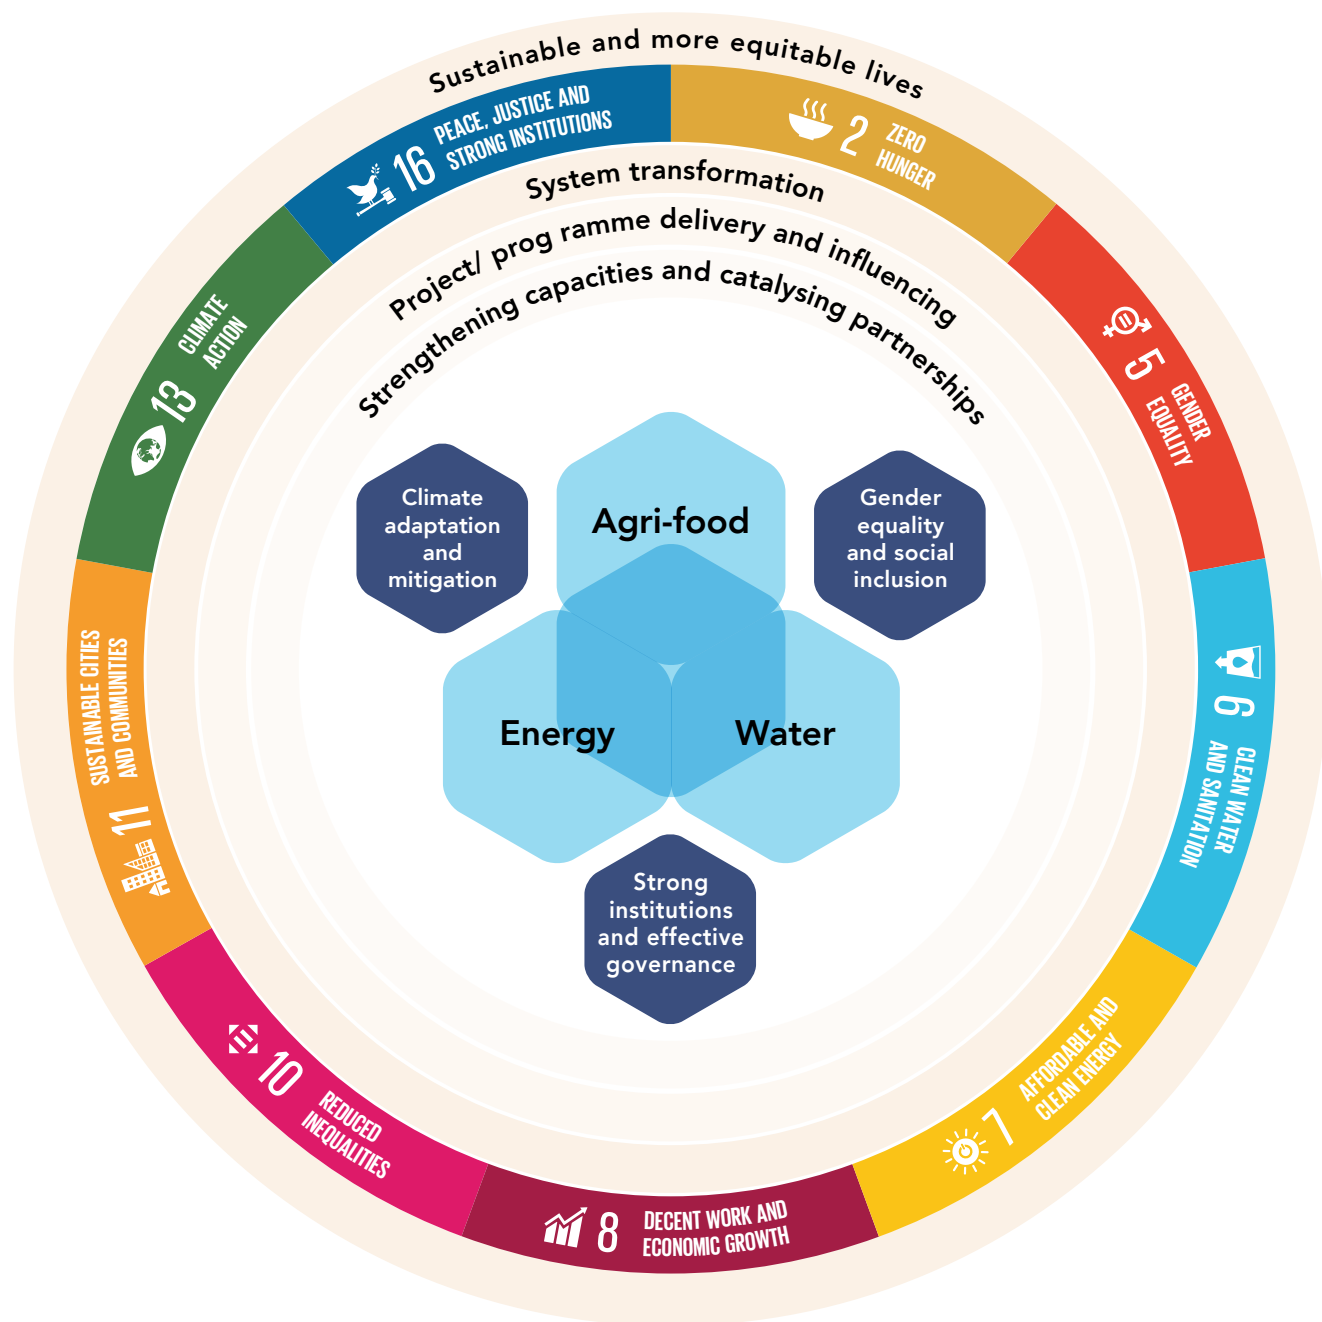

The Transformative Land Investment (TLI) project, focuses on supporting responsible Land Base Investment (LBI's), guided by national regulations and incentives, in order to make their utilization more economically, socially and environmentally advantageous by integrating inclusive development, implementation of sustainable food systems and agro-ecological principles into policy practice and business models.

What Drives Us:

In all that we do across these sectors, themes, and SDGs, SNV seeks to address inequality and focus on those at risk of being left behind, unable to lead dignified lives and without opportunities to thrive. This equality focus, central to our mission, addresses the thematic priority of social inclusion and aligns

with the universality principle embedded in the SDGs.

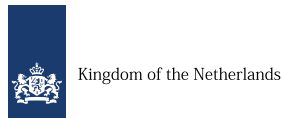

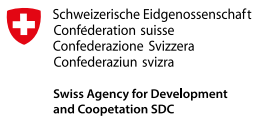

Driven by our mission, our work to 2030 is defined by the intersections between these nine SDGs, and our three sectors of focus and three core themes.

Our donors

Some of our key donors in Mozambique:

- Embassy of Kingdom of the Netherlands
- UKAID
- SDC
- Embassy of Sweden
- Sasol
- USAID

Technical partners

Some of our technical partners in Mozambique include:

- TechnoServe
